SUMMARY OF QUALIFICATIONS

Experienced **MERN Stack** Developer with a strong command of JavaScript, React.js, Node.js, Express.js, and MongoDB. Proficient in building full-stack web applications from scratch, with a focus on responsive, pixel-perfect frontends and efficient backend architecture. Successfully developed and deployed two complete frontend projects, showcasing hands-on expertise in API integration, third-party library utilization, and custom component creation to deliver seamless user experiences and robust functionality

Tools & Technologies:

- **UI Frameworks & Libraries**: React.js, Next.js, Material-UI (MUI),ChakraUI, Bootstrap, Tailwind CSS, shadcn/ui
- **JavaScript Libraries & Extensions**: redux-toolkit, Redux Thunk, RTK-Query, React-hook-form, Formik, Framer-Motion, Zod, Yup, Axios, React Router Dom
- **Node.js Frameworks & Libraries**: Express.js, Mongoose ODM
- **Database Systems**: MongoDB, MySQL
- **API Tools & Services**: REST APIs, Postman,
- **Code Hosting Platforms**: GitHub, Vercel, Netlify

Education:

Bachelors in Software Engineering   (2022 - present)
Virtual University of Pakistan   Pakistan

Associate Degree in Science   (2020 - 2022)
Superior Group of Colleges   Sargodha, Pakistan

Zeikh Technologies - Front-End Developer - (internship)   Dec 2024 - Feb 2025

I worked as a Frontend Developer Intern at Zeikh Technologies, where I enhanced my hands-on experience in frontend development. I created responsive web interfaces using HTML, CSS, JavaScript, React.js, and Next.js, and collaborated with the team to seamlessly integrate design and functionality. I focused on ensuring optimal performance and delivering a smooth user experience across various devices

Zeikh Technologies - Front-End Developer   Feb 2024 - Present

I'm currently working as a Frontend Developer at Zeikh Technologies, enhancing my hands-on experience in frontend development. I create responsive web interfaces using HTML, CSS, JavaScript, React.js, and Next.js, managing data flow effectively while collaborating with the team to seamlessly integrate design, functionality, and ensure optimal performance and a smooth user experience.

Project: Stayinn Hostels - Pakistan

I'm working on StayInn Hostels, a web platform for booking hostel rooms, where I handle both frontend and backend development using the MERN stack. The frontend is almost complete, and I am currently focused on building the backend and creating APIs with Node.js, Express.js, and MongoDB. The platform allows users to search for rooms, make bookings, and manage reservations. I ensure smooth functionality, optimize performance, and integrate secure payment options while managing the entire development process.

Project: pack And Track - UAE

I worked as a Frontend Developer on a Courier Management web application, where vendors could create and manage shipments, sending them from one location to another. I built the user interface using Next.js, Tailwind CSS, ShadCN, and Magic UI, ensuring a responsive design, smooth user experience, and real-time shipment tracking. My role involved integrating APIs to display dynamic data and optimizing the UI for efficiency and usability.

Project: Zask Tools - self

I'm developing a Tools Website, a web application that offers various utilities such as PDF tools, image tools, and video tools. As a MERN Stack Developer, I built the platform using Next.js, Tailwind CSS, ShadCN, Express.js, and MongoDB, ensuring a seamless and efficient user experience. The website is designed to be fast, responsive, and user-friendly, allowing users to perform tasks effortlessly. I also integrated APIs to enhance functionality and optimize real-time processing.
